## Preface

This volume constitutes the revised post-conference proceedings of the 17th European Conference on Multi-Agent Systems (EUMAS 2020) and the 7th International Conference on Agreement Technologies (AT 2020). The conferences were originally planned to be held in Thessaloniki, Greece, in April 2020, but were eventually held online between September 14-15, 2020. The 38 full papers presented in this volume were carefully reviewed and selected from a total of 53 submissions. The papers report on both early and mature research and cover a wide range of topics in the field of multi-agent systems.

EUMAS 2020 followed the tradition of previous editions (Oxford 2003, Barcelona 2004, Brussels 2005, Lisbon 2006, Hammamet 2007, Bath 2008, Agia Napa 2009, Paris 2010, Maastricht 2011, Dublin 2012, Toulouse 2013, Prague 2014, Athens 2015, Valencia 2016, Evry 2017, Bergen 2018) in aiming to provide the prime European forum for presenting and discussing agents research as the annual designated event of the European Association of Multi-Agent Systems (EURAMAS).

AT 2020 was the seventh instalment in a series of events (after Dubrovnik 2012, Beijing 2013, Athens 2015, Valencia 2016, Evry 2017, Bergen 2018) that focus on bringing together researchers and practitioners working on computer systems in which autonomous software agents interact, typically on behalf of humans, in order to come to mutually acceptable agreements. A wide scope of technologies can help provide the support needed for reaching mutually acceptable agreements, such as argumentation and negotiation, trust and reputation, computational social choice, coalition and team formation, coordination and distributed decision-making, and semantic alignment, to name a few.

This year, for the fifth time, both events were co-located and run as a single, joint event. This joint organization aimed to encourage and continue cross-fertilization among the broader EUMAS and the more specialized AT communities, and to provide a richer and more attractive program to participants. While the technical program was put together by their independent committees, the conferences shared keynote talks and aligned their schedules to minimize overlap and enable participants to make the best possible use of the combined program of the two conferences. Traditionally, both conference series have always followed a spirit of providing a forum for discussion and an annual opportunity for primarily European researchers to meet and exchange ideas. For this reason, they have always encouraged submission of papers that report on both early and mature research.

The peer-review processes carried out by both conferences put great emphasis on ensuring the high quality of accepted contributions. The 90-person EUMAS Program Committee accepted 32 submissions as full papers. The AT review process resulted in the acceptance of 6 full papers by the 54-person AT program committee.

This volume is structured in sections mirroring the presentation sessions of the joint event (<https://eumas2020.csd.auth.gr/>). In addition to the papers included in this volume, the program was highlighted by two great keynote talks, the first one by Professor Sarvapali (Gopal) Ramchurn of the Department of Electronics and Computer Science, University of Southampton, UK, on "Emerging Challenge Areas for AI and Multi-Agent Systems: From Sports to Maritime", and the second one by Professor Pavlos Moraitis of the Department of Mathematics and Computer Science, University of Paris, France, on "Computational Argumentation: From Theory to Market". Two papers of EUMAS stood out from the rest and were nominated by the EUMAS Program Chairs as candidates for the best paper award. These two papers were presented in a special session and then a committee composed of all the EUMAS and AT program chairs and one of the keynote speakers, Prof. Pavlos Moraitis, decided that the award should be shared among them.

The editors would like to thank all authors for submitting to EUMAS and AT, all participants, the invited speakers, the members of the Program Committees, and the additional reviewers for putting together a strong joint program. We also thank the local organizers for their hard work organizing the events. Finally, we would like to express our gratitude to the sponsors of the conferences: Aristotle University of Thessaloniki for providing technical and human resources, MDPI Computers Journal for sponsoring the EUMAS Best Paper Award, the Journal of Autonomous Agents and Multi-Agent Systems for agreeing to publish extended versions of the EUMAS best and runner-up papers, and SN Computer Science Journal for agreeing to publish a special issue with selected extended EUMAS papers.

November 2020

# Organization

## **EUMAS 2020 Program Chairs**

Nick Bassiliades                      Aristotle University of Thessaloniki, Greece  
Georgios Chalkiadakis              Technical University of Crete, Greece

## **AT 2020 Program Chair**

Dave de Jonge                      Spanish National Research Council (CSIC),  
Spain

## **EUMAS 2020 Program Committee**

Stergos Afantenos	IRIT, CNRS/Université Paul Sabatier
Thomas Ågotnes	University of Bergen
Juan Antonio Rodriguez Aguilar	IIIA-CSIC
Stéphane Airiau	LAMSADE - Université Paris-Dauphine
Charilaos Akasiadis	NCSR Demokritos
Samir Aknine	Lyon 1 University
Fred Amblard	IRIT - University Toulouse 1 Capitole
Merlinda Andoni	Heriot-Watt University
Costin Badica	University of Craiova
Ana L. C. Bazzan	Universidade Federal do Rio Grande do Sul
Antonis Bikakis	University College London
Filippo Bistaffa	IIIA-CSIC
Olivier Boissier	Mines Saint-Etienne
Vicent Botti	Universitat Politècnica de València
Ioana Boureanu	University of Surrey
Nils Bulling Clausthal	University of Technology and BCG Platiniön
Cristiano Castelfranchi	Institute of Cognitive Sciences and Technologies
Alberto Castellini	Verona University
Sofia Ceppi	PROWLER.io
Angelos Chliaoutakis	Technical University of Crete
Massimo Cossentino	National Research Council of Italy
Natalia Criado	King's College London
Aleksander Czechowski	Delft University of Technology

Mathijs De Weerdt	Delft University of Technology
Catalin Dima	LACL, Université Paris Est - Créteil
Dragan Doder	University of Belgrade
Sylvie Doutre	University of Toulouse 1 - IRIT
Edith Elkind	University of Oxford
Alessandro Farinelli	Verona University
Nicoletta Fornara	Università della Svizzera Italiana
Malvin Gattinger	University of Groningen
Benoît Gaudou	UMR 5505 CNRS, IRIT, Université de Toulouse

Milos Savic	University of Novi Sad
Francesca Toni	Imperial College London
László Zsolt Varga	ELTE IK
Marin Vukovic	University of Zagreb
Remi Wieten	Utrecht University

#### **EUMAS 2020 External Reviewers**

Ioannis Antonopoulos	Heriot-Watt University
Thanasis Baharis	Technical University of Crete
Benoit Barbot	LACL, Université Paris Est - Créteil
Jinke He	TU Delft
Can Kurtan	Utrecht University
Salvatore Lopes	National Research Council of Italy
Ouri Poupko	Weizmann Institute
Dimitrios Troullinos	Technical University of Crete
Onuralp Ulusoy	Utrecht University
Xingyu Zhao	Heriot-Watt University

#### **Local Organizing Committee**

Konstantinos Gounis	Aristotle University of Thessaloniki
Kalliopi Kravari	Aristotle University of Thessaloniki
Ioannis Mollas	Aristotle University of Thessaloniki
Emmanouil Rigas	Aristotle University of Thessaloniki
Alexandros Vassiliades	Aristotle University of Thessaloniki

# Contents

## **EUMAS 2020 Session 1: Intelligent agents and MAS applications**

Towards a Theory of Intentions for Human-Robot Collaboration . . . . .	1
<i>Mohan Sridharan, Rocio Gomez, Heather Riley</i>	
Decentralised Control of Intelligent Devices: A Healthcare Facility Study .	17
<i>Sacha Lhopital, Samir Aknine, Vincent Thavonekham, Huan Vu, Sarvapali Ramchurn</i>	
Decentralised Multi-Intersection Congestion Control for Connected Autonomous Vehicles . . . . .	33
<i>Huan Vu, Samir Aknine, Sarvapali Ramchurn, Alessandro Farinelli</i>	
Congestion Management for Mobility-on-Demand Schemes that use Electric Vehicles . . . . .	48
<i>Emmanouil Rigas, Konstantinos Tsompanidis</i>	
Disaster Response Simulation as a Testbed for Multi-Agent Systems . . .	63
<i>Tabajara Krausburg, Vinicius Chrisosthemos, Rafael H. Bordini, Jürgen Dix</i>	

## **EUMAS 2020 Session 2: Mechanisms, Incentives, Norms, Privacy**

Rewarding miners: bankruptcy situations and pooling strategies . . . . .	78
<i>Marianna Belotti, Stefano Moretti, Paolo Zappala</i>	
A Game-Theoretical Analysis of Charging Strategies for Competing Double Auction Marketplaces . . . . .	93
<i>Bing Shi, Xiao Li</i>	
Agents for Preserving Privacy: Learning and Decision Making Collaboratively . . . . .	108
<i>Onuralp Ulusoy, Pinar Yolum</i>	
Open Social Systems . . . . .	124
<i>Nardine Osman, Carles Sierra, Ronald Chenu-Abente, Qiang Shen, Fausto Giunchiglia</i>	
A Faithful Mechanism for Privacy-Sensitive Distributed Constraint Satisfaction Problems . . . . .	136
<i>Farzaneh Farhadi, Nicholas R. Jennings</i>	

Incentivising Exploration and Recommendations for Contextual Bandits with Payments .....	151
<i>Priyank Agrawal, Theja Tulabandhula</i>	
Emotional Agents Make a (Bank) Run .....	163
<i>Konstantinos Grevenitis, Ilias Sakellariou, Petros Kefalas</i>	

### **EUMAS 2020 Session 3: Autonomous Agents**

An Interface for Programming Verifiable Autonomous Agents in ROS .....	181
<i>Rafael C. Cardoso, Angelo Ferrando, Louise Dennis, Michael Fisher</i>	
Integrated Commonsense Reasoning and Deep Learning for Transparent Decision Making in Robotics .....	196
<i>Mohan Sridharan, Tiago Mota, Ales Leonardis</i>	
Combining Lévy Walks and Flocking for Cooperative Surveillance using Aerial Swarms .....	214
<i>Hugo Sardinha, Mauro Dragone, Patricia A. Vargas</i>	
Single-Agent Policies for the Multi-Agent Persistent Surveillance Problem via Artificial Heterogeneity .....	232
<i>Thomas Kent, Arthur Richards, Angus Johnson</i>	
Explaining the influence of prior knowledge on POMCP policies .....	250
<i>Alberto Castellini, Enrico Marchesini, Giulio Mazzi, Alessandro Farinelli</i>	

### **EUMAS 2020 Best Papers Session**

Approximating Voting Rules from Truncated Ballots .....	266
<i>Manel Ayadi, Nahla Ben Amor, Jerome Lang</i>	
Privacy-Preserving Dialogues between Agents: A Contract-Based Incentive Mechanism for Distributed Meeting Scheduling .....	284
<i>Boya Di, Nicholas R. Jennings</i>	

### **EUMAS-AT 2020 Joint Session**

An argumentation-based approach to generate domain-specific explanations	301
<i>Nadin Kokciyan, Simon Parsons, Isabel Sassoon, Elizabeth Sklar, Sanjay Modgil</i>	
Distributed multi-issue multi-lateral negotiation using a divide and rule approach .....	319
<i>Ndeye Arame Diago, Samir Aknine, Sarvapali Ramchurn, Elhadj Ibrahim Diago</i>	
Increasing negotiation performance at the edge of the network .....	332
<i>Sam Vente, Angelika Kimmig, Alun Preece, Federico Cerutti</i>	

Challenges and Main Results of the Automated Negotiating Agents Competition (ANAC) 2019 .....	347
<i>Reyhan Aydogan, Tim Baarslag, Katsuhide Fujita, Johnathan Mell, Jonathan Gratch, Dave de Jonge, Yasser Mohammad, Shinji Nakadai, Satoshi Morinaga, Hirotaka Osawa, Claus Aranha, Catholijn M. Jonker</i>	
Optimal Majority Rule Versus Simple Majority Rule .....	363
<i>Vitaly Malyshev</i>	
Evaluating Crowdshipping Systems with Agent-Based Simulation .....	379
<i>Jeremias Dötterl, Ralf Bruns, Jürgen Dunkel, Sascha Ossowski</i>	

### **EUMAS 2020 Session 4: Agent-based models, Social choice, Argumentation, Model-checking**

Measuring the Strength of Rhetorical Arguments .....	394
<i>Mariela Morveli Espinoza, Juan Carlos Nieves, Cesar Augusto Tacla</i>	
Understanding the role of values and norms in practical reasoning ....	410
<i>Jazon Szabo, Jose M. Such, Natalia Criado</i>	
Predicting the winners of Borda, Kemeny and Dodgson elections with supervised machine learning .....	418
<i>Hanna Kujawska, Marija Slavkovik, Jan-J. Rückmann</i>	
From Virtual Worlds to Mirror Worlds: A Model and Platform for Building Agent-based eXtended Realities .....	436
<i>Angelo Croatti, Alessandro Ricci</i>	
Model-checking Information Diffusion in SocialNetworks with PRISM	452
<i>Louise Dennis, Marija Slavkovik</i>	
"Roads? Where we're going we don't need roads." Using Agent-based modeling to analyze the economic impact of Hyperloop introduction on a supply chain .....	470
<i>Francesco Bertolotti, Riccardo Ocra</i>	
Sensitivity to Initial Conditions in Agent-based Models .....	478
<i>Francesco Bertolotti, Angela Locoro, Luca Mari</i>	

### **EUMAS 2020 Session 5: Agent-oriented software engineering, Game Theory, Task Allocation, Learning**

Statecharts and Agent Technology: The Past and Future .....	486
<i>Nikolaos Spanoudakis</i>	
A Game Of Double Agents: Repeated Stackelberg Games with Role Switch	504
<i>Matteo Murari, Alessandro Farinelli, Riccardo Sarte</i>	

Learning Summarised Messaging through Mediated Differentiable Inter-Agent Learning .....	521
<i>Sharan Gopal, Rishabh Mathur, Shaunak Deshwal, Anil Singh Parihar</i>	
Integrating Deep Learning and Non-monotonic Logical Reasoning for Explainable Visual Question Answering .....	534
<i>Mohan Sridharan, Heather Riley</i>	
Multiagent Task Coordination as Task Allocation Plus Task Responsibility	546
<i>Vahid Yazdanpanah, Mehdi Dastani, Shaheen Fatima, Nicholas R. Jennings, Devrim M. Yazan, Henk Zijm</i>	
Anytime and Efficient Coalition Formation with Spatial and Temporal Constraints .....	564
<i>Luca Capezzuto, Danesh Tarapore, Sarvapali Ramchurn</i>
